

Day 10 Assignment - Hitik Panchal

In [1]:

```
import pandas as pd
import numpy as np
import matplotlib.pyplot as plt
%matplotlib inline
import seaborn as sns
```

Reading the Data

In [3]:

```
gen_data=pd.read_csv('general_data.csv')
gen_data.head()
```

Out[3]:

	Age	Attrition	BusinessTravel	Department	DistanceFromHome	Education	EducationFie
0	51	No	Travel_Rarely	Sales	6	2	Life Scienc
1	31	Yes	Travel_Frequently	Research & Development	10	1	Life Scienc
2	32	No	Travel_Frequently	Research & Development	17	4	Oth
3	38	No	Non-Travel	Research & Development	2	5	Life Scienc
4	32	No	Travel_Rarely	Research & Development	10	1	Medic

5 rows × 24 columns

In [4]:

```
gen_data.info()
```

```
<class 'pandas.core.frame.DataFrame'>
```

```
RangeIndex: 4410 entries, 0 to 4409
```

```
Data columns (total 24 columns):
```

#	Column	Non-Null Count	Dtype
0	Age	4410 non-null	int64
1	Attrition	4410 non-null	object
2	BusinessTravel	4410 non-null	object
3	Department	4410 non-null	object

```

Cleaning the Data

In [5]:

```
gen_data.isnull().any()
```

Out[5]:

Age	False
Attrition	False
BusinessTravel	False
Department	False
DistanceFromHome	False
Education	False
EducationField	False
EmployeeCount	False
EmployeeID	False
Gender	False
JobLevel	False
JobRole	False
MaritalStatus	False
MonthlyIncome	False
NumCompaniesWorked	True
Over18	False
PercentSalaryHike	False
StandardHours	False
StockOptionLevel	False
TotalWorkingYears	True
TrainingTimesLastYear	False
YearsAtCompany	False
YearsSinceLastPromotion	False
YearsWithCurrManager	False

dtype: bool

In [6]:

```
gen_data.fillna(0 , inplace=True)
```

In [8]:

```
gen_data.isnull().any()
```

Out[8]:

Age	False

4409	40	No	Travel_Rarely	Research & Development	28	3	M

4410 rows × 24 columns

Hypothesis from the Data

Hypothesis 1 : Attrition percentage is less than 20 %

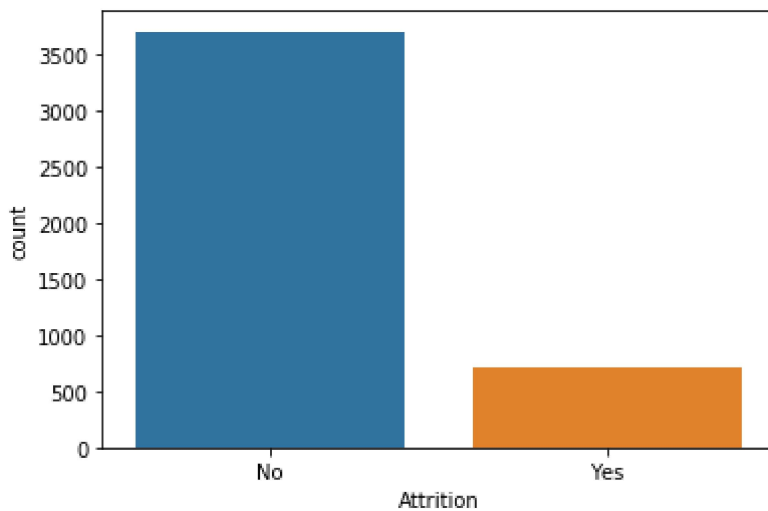

In [11]:

```
print("Entries with Attrition Yes : ",len(gen_data[gen_data['Attrition']=='Yes']))
print("Entries with Attrition No : ",len(gen_data[gen_data['Attrition']=='No']))
print("Percentage of Yes Attrition is : ",(len(gen_data[gen_data['Attrition']=='Yes'])/len(gen_data))*100,"%")
print("Percentage of No Attrition is : ",(len(gen_data[gen_data['Attrition']=='No'])/len(gen_data))*100,"%")
```

```
Entries with Attrition Yes : 711
Entries with Attrition No : 3699
Percentage of Yes Attrition is : 16.122448979591837 %
Percentage of No Attrition is : 83.87755102040816 %
```

In [12]:

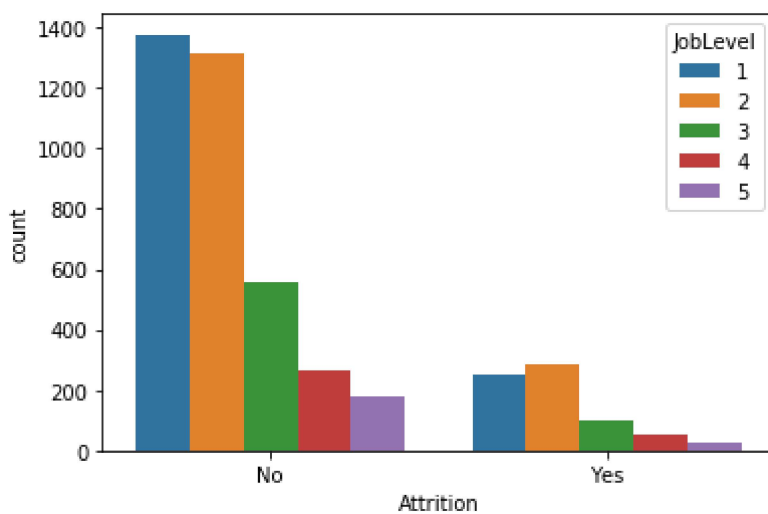

```
sns.countplot(x = "Attrition",data=gen_data)  
plt.show()
```

Hypothesis 2 : Attrition is more for Job Level ≥ 2

In [13]:

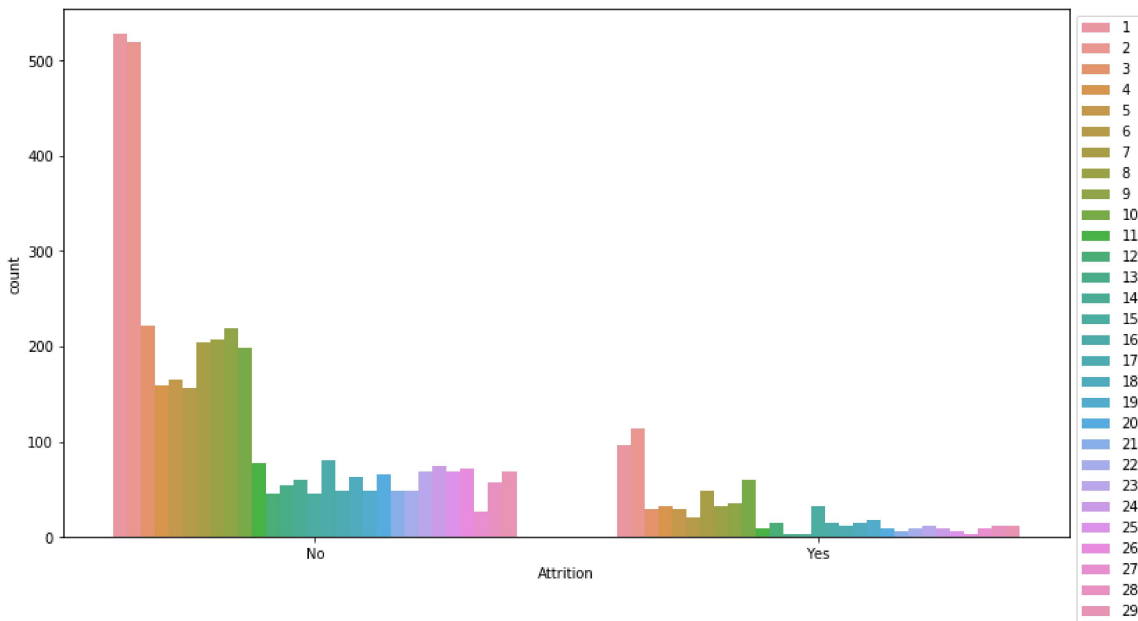

```
sns.countplot(x = "Attrition",data=gen_data,hue="JobLevel")  
plt.show()
```

Hypothesis 3 : Attrition is more if Distance from Home is ≤ 10 km

In [43]:

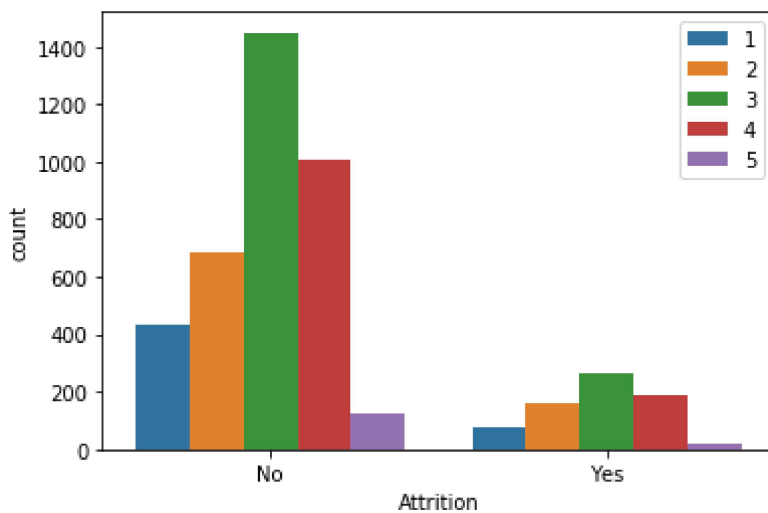

```
plt.figure(figsize=(13,7))
sns.countplot(x = "Attrition",data=gen_data,hue="DistanceFromHome")
plt.legend(bbox_to_anchor=(1,1))
plt.show()
```

Hypothesis 4 : Attrition is more if Education level is < 5

In [34]:

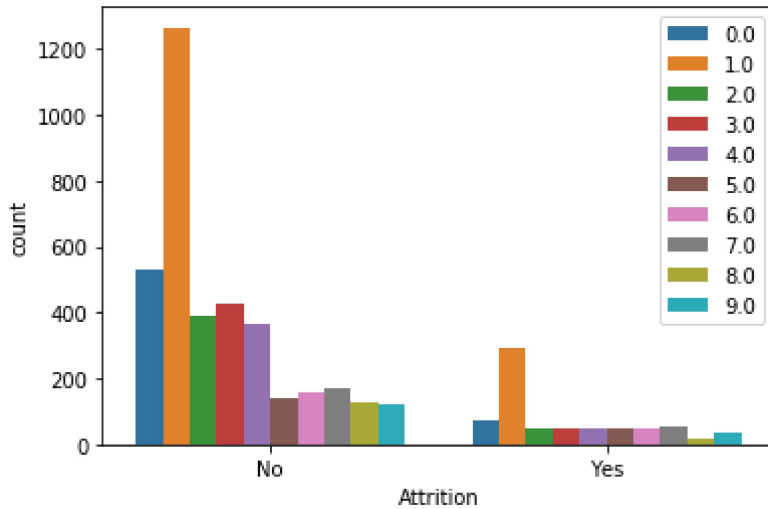

```
sns.countplot(x = "Attrition",data=gen_data,hue="Education")
plt.legend(bbox_to_anchor=(1,1))
plt.show()
```

Hypothesis 5 : Attrition is more if Number of Companies worked for is > 1

In [38]:

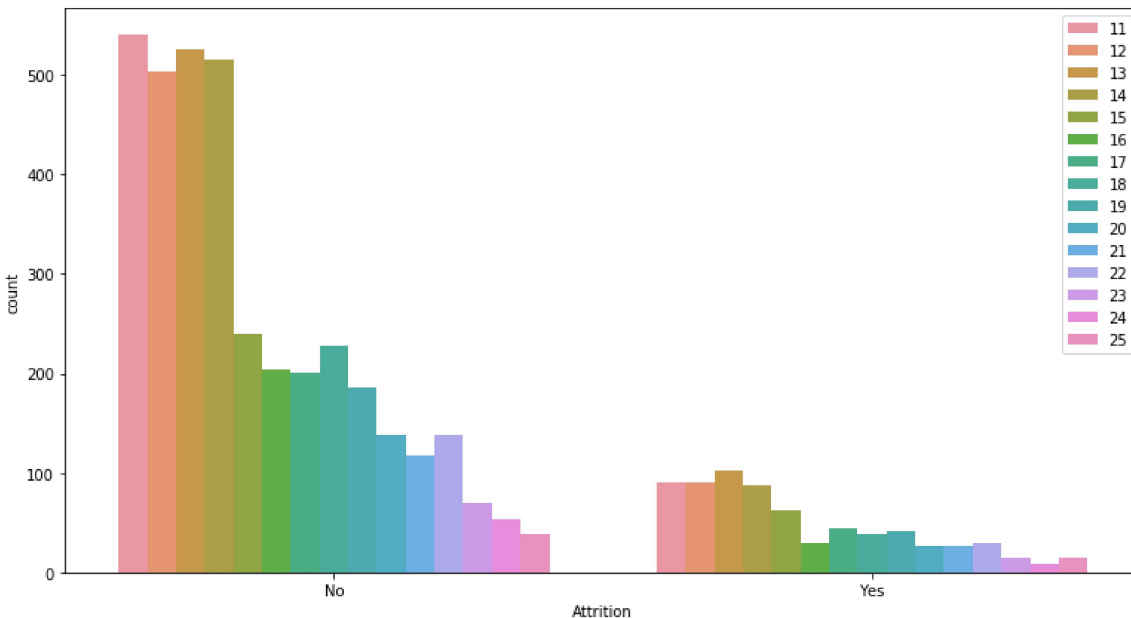

```
sns.countplot(x = "Attrition",data=gen_data,hue="NumCompaniesWorked")
plt.legend(bbox_to_anchor=(1,1))
plt.show()
```

Hypothesis 6 : Attrition is more if Percentage Salary Hike is < 20 %

In [42]:

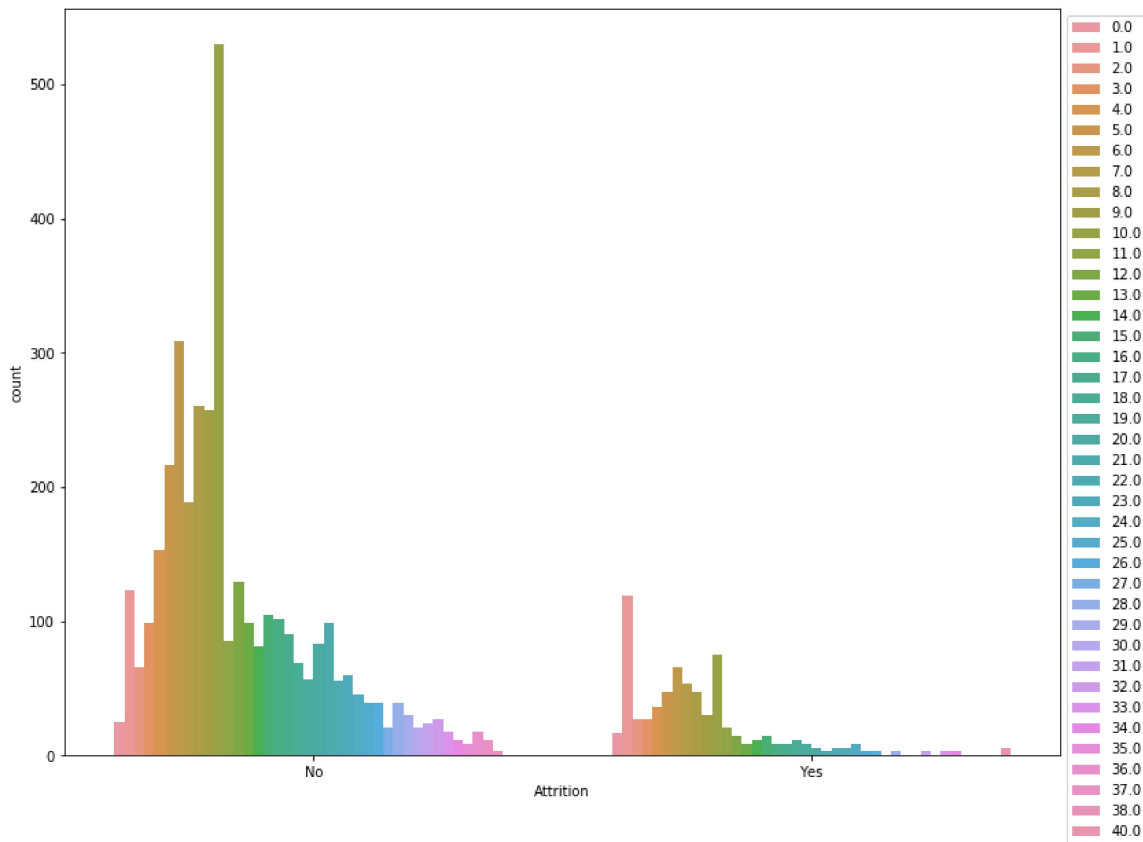

```
plt.figure(figsize=(13,7))
sns.countplot(x = "Attrition",data=gen_data,hue="PercentSalaryHike")
plt.legend(bbox_to_anchor=(1,1))
plt.show()
```

Hypothesis 7 : Attrition is more if Total Working Years is < 20 years

In [44]:

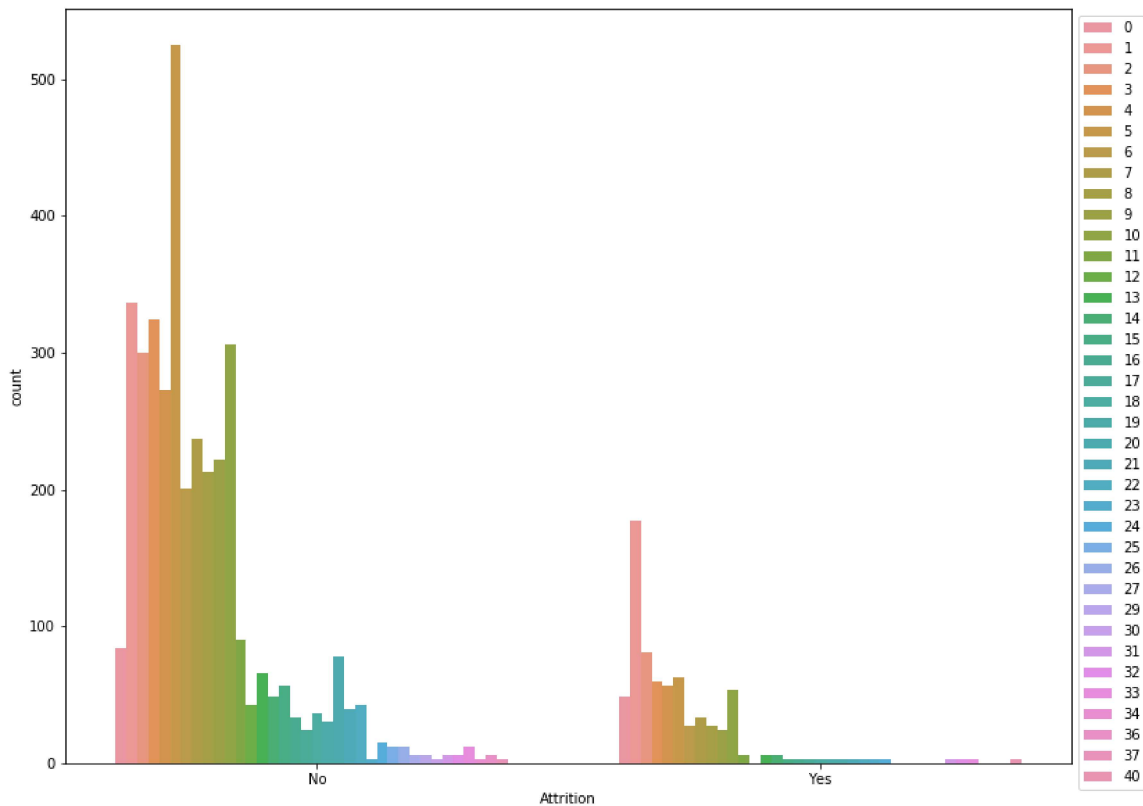

```
plt.figure(figsize=(13,10))
sns.countplot(x = "Attrition",data=gen_data,hue="TotalWorkingYears")
plt.legend(bbox_to_anchor=(1,1))
plt.show()
```

Hypothesis 8 : Attrition is more if Years at Company is < 10 years

In [46]:

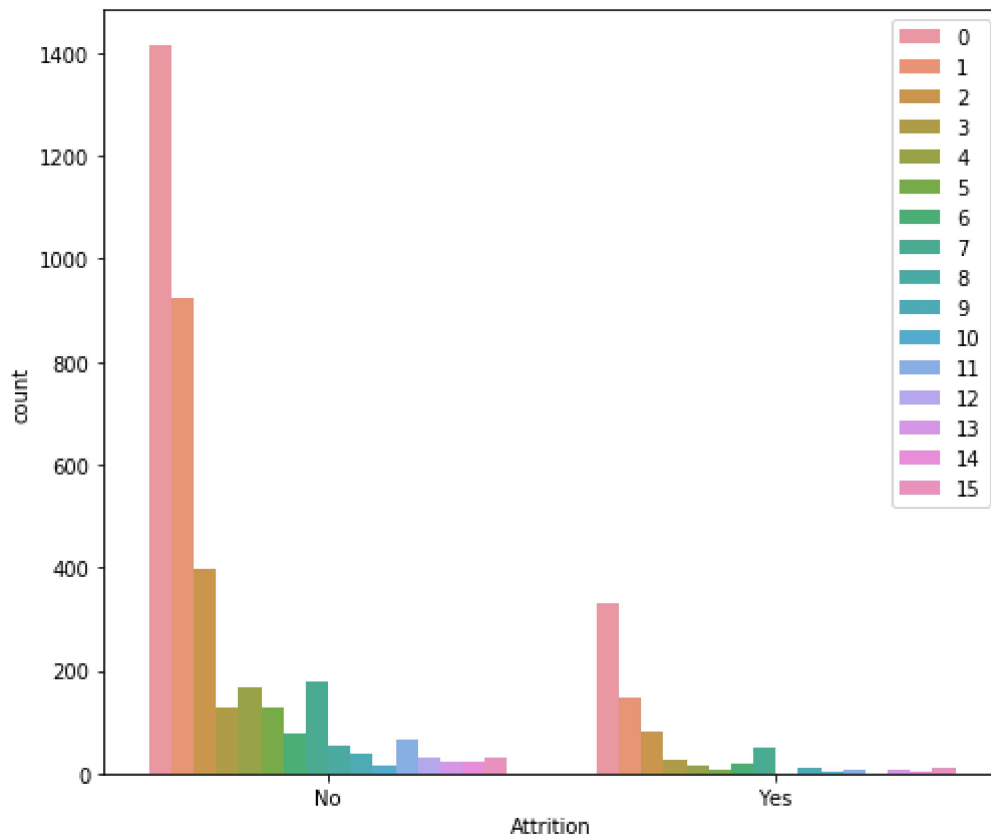

```
plt.figure(figsize=(13,10))  
sns.countplot(x = "Attrition",data=gen_data,hue="YearsAtCompany")  
plt.legend(bbox_to_anchor=(1,1))  
plt.show()
```

Hypothesis 9 : Attrition is more if Years Since Last Promotion is < 10 years

In [49]:

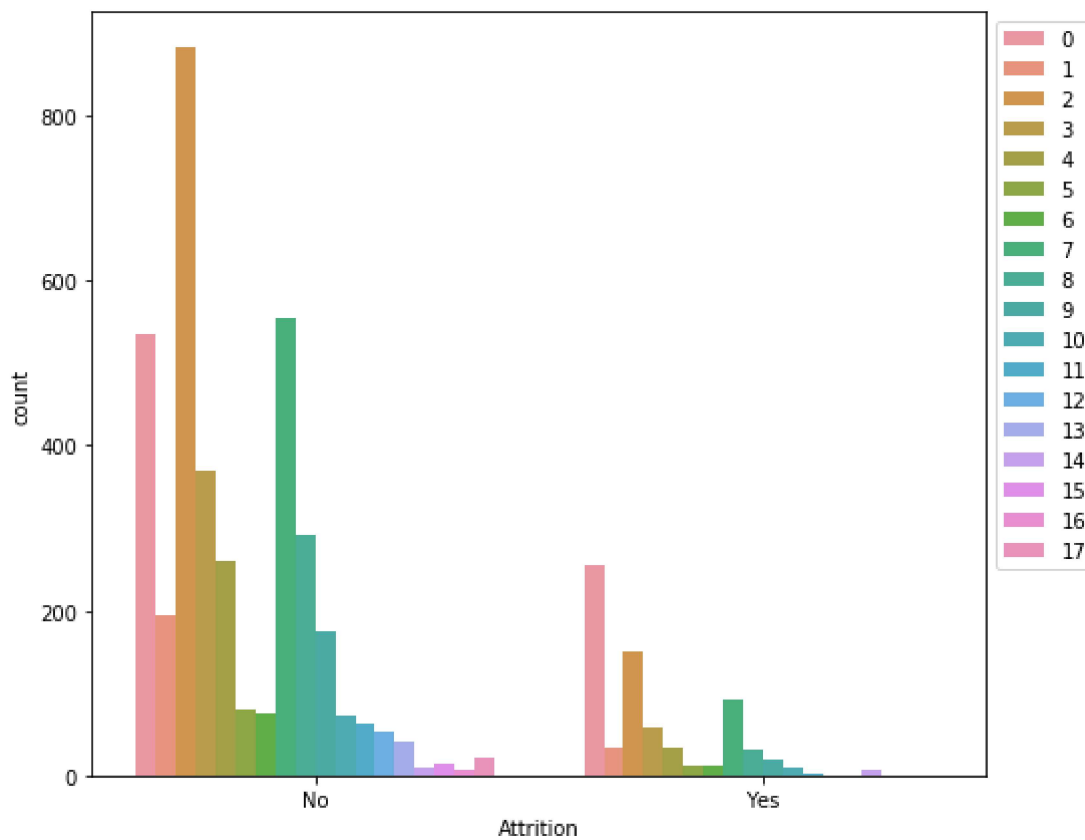

```
plt.figure(figsize=(8,7))
sns.countplot(x = "Attrition",data=gen_data,hue="YearsSinceLastPromotion")
plt.legend(bbox_to_anchor=(1,1))
plt.show()
```

Hypothesis 10 : Attrition is more if Years with Current Manager is < 10 years

In [50]:

```
plt.figure(figsize=(8,7))  
sns.countplot(x = "Attrition",data=gen_data,hue="YearsWithCurrManager")  
plt.legend(bbox_to_anchor=(1,1))  
plt.show()
```
